

Power Vented Residential Gas Water Heaters

Power Vented Water Heaters

Lochinvar's Power Vented residential gas models are available in 40, 50 and 75 gallon capacities, feature a power vent system for sidewall or rooftop termination and are qualified for ENERGY STAR®.

Standard Features

- **ENERGY STAR** - The Power Vented water heaters except PVN075 75ST meet the ENERGY STAR requirement with .70 Energy Factors and are eligible for most utility rebate programs.
 - **Code Compliance** – Complies with the Federal Energy Conservation Standards effective April 16, 2015, in accordance with the Energy Policy and Conservation Act, (EPCA), as amended.
 - **Power Vented Exhaust System** – A quiet and efficient blower provides power vent operation through 2", 3" or 4" PVC, CPVC or Polypropylene vent pipe and plug into a standard 110v/120v outlet with a 6 foot power cord. The vent may terminate through a sidewall or the roof and may run up to 180 equivalent feet.
 - **Flammable Vapor Ignition Resistant** – An air intake snorkel elevates the combustion air openings which prevents flammable vapors from entering the combustion chamber.
 - **Electronic Gas Control** – The gas valve features hot surface ignition, control logic for precise temperature control and an LED status indicator for simplified service diagnostics. The design includes a safety thermal high limit switch, a flammable vapor sensor and protection from lint, dust and oil buildup.
 - **Glass-Lined Steel Tank** – The durable glass lining is fused to the steel tank at 1600°F to assure lasting protection against rust and corrosion while providing clear, clean hot water. 300 PSI test pressure; 150 PSI working pressure.
 - **Non-CFC Foam Insulation** – A uniform coverage of thick closed-cell foam insulation minimizes standby heat loss, maximizes heat retention and delivers a high Energy Factor.
 - **Tank Saver Anode** – A large diameter, high capacity anode inhibits corrosion of the tank interior for long, trouble-free service.
 - **Heat Trap** – Heat traps are built into the inlet and outlet connections to eliminate heat migration and heat loss in the water piping.
 - **Sight Glass** – A built-in sight glass provides an unobstructed view of the burner and pilot flame.
 - **Temperature & Pressure Relief Valve** – Factory installed for optimum safety.
 - **Brass Drain Valve** – An enhanced ball valve design for effective drainage and positive shut-off.
 - **6 Year Limited Tank & Parts Warranty*** – See warranty sheet for details.
 - **10 Year Extended Warranty** – Available for residential applications only.
- * 1-year limited tank & parts warranty when installed in a commercial application.

All models meet or exceed Federal and ASHRAE Energy Efficiency Standards

Notes: In the model number, "N" indicates Natural gas; replace "N" with "L" to indicate L.P. gas models.
 For the 50,000 Btu models, add "ST" to the model number for optional Side Tappings. (Ex: PVN04050ST)
 Side Tappings are standard on 62,000 and 76,000 Btu models and not available on 40,000 Btu/hr models.
 *PVN075 75ST is not Energy Star qualified.

Certified for Potable Water and Space Heating Applications

This water heater is suitable for water heating and space heating. Toxic chemicals, such as those used for boiler water treatment shall NEVER be introduced into this system. This water heater may NEVER be connected to any existing heating system or components previously used with non-potable water heating appliances.

FOR EASE IN ORDERING BY MODEL NUMBER

This is a Power Vented, residential, natural gas 40 gallon water heater with 40,000 Btu/hr input.
